Security Chaperone

This service is an essential and value-added element of the Super Yacht experience consisting of:

i. Travel Management – We can cover everything from the client pick-up to drop-off, and guest travel movements in between. The chaperone can take responsibility for the organisation and management of this essential service and what can sometimes be a logistical challenge. This frees the captain and crew to concentrate on the preparation and running of the yacht.

ii. Itinerary Management – The chaperone can manage daily details in the itinerary and can make final adjustments, last-minute changes and handle specific requests for the client – thus ensuring, for example, that the best table is identified and secured, the Maitre D' is 'recruited', the waiter specifically briefed and the bills settled. These are just some of the tasks the chaperone carries out on behalf of the client, allowing the group to fully relax and enjoy 'seamless vacations

iii. Travel Security – This can be closely coordinated with travel management and involves a comprehensive plan of action being drawn up for each location and being briefed to the captain and relevant crew.

iv. Crisis Management – Good crisis management gives the client a specific edge, an advantage, in any situation. If unfortunate enough to be caught in a crisis, the chaperone will have the specialist expertise required to support and effectively respond to a wide range of crises. The chaperone will protect the client's reputation, environment, guests and employees. It is a given that in hiring the right service provider you are guaranteeing absolute excellence in this critical area.

v. Venue Evacuation and Emergency Coordination – The chaperone is specifically equipped to provide immediate and 'on-the-ground' support as early as possible in the case of an emergency or evacuation. The chaperone is trained to provide an assured proactive response to a range of emergency situations, which include non-medical evacuations. This service is a key element within travel security.

Super Yacht Security

A discreet service for Captains and Owners alike providing well-trained personnel that fit into your crew and take over the responsibility of access control.

Super Yacht Transit Security

The provision of experienced protection teams or advisors to complement the Ship Security Plan through areas of uncertain security.

New Build Security Consultation

Security System Design Consultation for Project Managers and Owners providing end-user insight and experience to fine-tune and complement proposed security systems.

Crew Training

Practical Security Procedures. We teach extensive personal security procedures and techniques that form the basis of effective general yacht security. This training can continue with on-board yacht-specific security programmes.

Counter Piracy Course. Crew training in piracy tactics and effective counter measures.

Conflict Management. How to react if involved in a hostile situation onboard or ashore.

Self Defence. Crew training in basic self defence and arrest techniques.

Team Building. Promotes teamwork, improves performance and increases crew efficiency.

Crew Screening

A tailored screening service that assess the integrity and suitability of potential crew.

Emergency Response/Crisis Management

A 24/7 response service that provides immediate back-up to any incident worldwide.
