## Who we are

Veritas believes in offering our partners certainty in a world of risk. We are a specialist company offering high level consultancy to corporate and private organisations and individuals.

We develop close relationships with our partners who appreciate total professionalism and discretion. Our work is based on careful assessment and analysis of our partners' security needs.

In an unregulated market, our partners can rely on consultants who have worked closely together for up to ten years. Uniquely, our consultants are almost entirely recruited from long serving members of the British Special Forces, who have subsequently gained significant experience within the private sector.

We stand out from our competitors in many ways, including the level of training and capability we maintain. We use our own patented Veritas Certainty Indicator to measure and advise on our partners' exposure to risk. This method is achieving increasing recognition as a benchmark, particularly within the insurance and legal professions.

**Move beyond risk into certainty.**

## What we do

**We deliver comprehensive and bespoke solutions to provide our partners certainty in respect of all and every possible threat. We work internationally with a wide variety of corporate, private and governmental organisations.**

From the initial consultation, Veritas consultants work to ascertain and then reduce the risk for our partners - to introduce the required level of certainty according to the Veritas Certainty Indicator.

We provide physical security on the ground, training, certification, procurement and/or a comprehensive set of actionable recommendations.

**Veritas delivers certainty through excellence.**
